

INDUSTRIAL SECURITY & SECURITY OPERATIONS ADVISORY

Industrial security expertise. Modern security operations. Practical execution.

Helping defense contractors and commercial and technology organizations supporting the U.S. defense and national security ecosystem build, mature, assess and modernize security programs.

NISP / 32 CFR Part 117

FCL readiness

personnel security

insider threat

self-inspection

physical security

ASSESS

Understand the current state.

BUILD

Design stronger programs.

MODERNIZE

Improve process and visibility.

LEAD

Provide experienced leadership.

INDUSTRIAL SECURITY

Industrial Security Readiness & Advisory

Unclassified advisory rooted in NISP / 32 CFR Part 117 and ICD-aligned environments, focused on readiness, structure and sustainable program operations.

Best for: Defense contractors entering, establishing, scaling or strengthening an industrial-security program.

Engagement scope tailored to client needs.

ASSESS

Security Program Assessment & Roadmap

Independent review of program effectiveness, roles, processes, reporting, technology and governance, translated into practical findings and a prioritized roadmap.

Best for: Organizations facing growth, fragmented processes, limited visibility or uncertainty about program effectiveness.

Engagement scope tailored to client needs.

BUILD

Security Program Development & Maturation

Build or mature disciplined security programs through governance, roles/RACI, policies, training, metrics, incident processes and repeatable operating routines.

Best for: New security functions, rapid growth, organizational change or programs outgrowing informal practices.

Engagement scope tailored to client needs.

MODERNIZE

Security Operations Modernization

Improve manual or fragmented operations through process mapping, workflow redesign, dashboards, tailored security-management tools and low-code/scripted automation.

Best for: Manual workflows, disconnected tools, duplicate effort, poor reporting or limited management visibility.

Engagement scope tailored to client needs.

PHYSICAL SECURITY

Physical Security & Facility Advisory

Independent facility and protective-operations reviews covering access control, visitors, CCTV, alarms, credentialing, monitoring, procedures and technology requirements.

Best for: Corporate offices, R&D, data centers, manufacturing, contractor facilities and multi-site environments.

Engagement scope tailored to client needs.

LEAD

Security Project Leadership & Senior Advisory

Experienced leadership for program stand-up, maturation, remediation, facility projects, system implementation, vendor coordination and roadmap execution.

Best for: Complex initiatives or organizations needing temporary senior-security capacity and execution support.

Engagement scope tailored to client needs.

AD HOC & SPECIALIZED ADVISORY

Focused senior-level advisory and project support for needs outside the defined service packages. Engagements are scoped based on complexity, urgency, and level of effort.

LIMITED FOUNDING OFFER
FIRST 3 QUALIFYING CLIENTS

Founding Security Program Assessment

Focused document review • 3-5 stakeholder interviews • condensed findings • prioritized 30/60/90 roadmap • leadership readout • target delivery ~2 weeks
